MIDHUN RAJ

PYTHON DEVELOPER

Wayanad, Kerala, India | 9746240156 | midhunraj303@gmail.com
LinkedIn | GitHub

PROFESSIONAL SUMMARY

Python developer with hands-on experience building end-to-end backend applications, working with relational databases, REST APIs, and containerized deployments. Experienced in writing clean, maintainable, well-documented Python code and debugging applications using structured logging and error handling. Foundational knowledge of Django from self-directed coursework, with a strong Computer Science background and a fast learning track record across multiple technical domains. Comfortable working with Git-based collaboration and following structured coding practices.

TECHNICAL SKILLS

- Languages: Python, SQL
- Backend & Web: Django, Flask (foundational), REST API integration
- Databases: PostgreSQL, SQLite - queries, schema design
- Containerization: Docker, Docker Compose
- Debugging & Logging: Structured logging, error handling, exception management
- Version Control: Git, GitHub
- Code Quality: Clean, modular, documented code; code review experience (via teaching/mentoring)
- Additional: PySpark, Apache Airflow, AWS S3, pandas, HTML/CSS

PROJECTS

Retail Sales ETL Pipeline
Python, PySpark, Apache Airflow, Docker, PostgreSQL, SQLite | github.com/midhunraj-303/retail-sales-etl-pyspark-airflow

- Designed and developed an end-to-end Python application processing 4,310 retail sales records, with modular, maintainable code structure
- Implemented data validation and error-handling logic to identify and resolve data quality issues
- Worked with PostgreSQL and SQLite databases for structured data storage and retrieval
- Containerized the application using Docker for consistent, reproducible execution
- Managed source code using Git with a clear, documented commit history

News API ETL Pipeline
Python, PySpark, PostgreSQL, Apache Airflow, Docker | github.com/midhunraj-303/news-api-etl-pipeline

- Built and integrated a REST API client to fetch live data from NewsAPI into a Python application
- Applied exception handling and environment-based configuration management for reliable execution
- Structured the codebase into reusable, well-documented Python modules
- Debugged and resolved data processing issues using structured logs across the pipeline

RELEVANT EXPERIENCE

Assistant Professor, Computer Science *Wayanad, Kerala*
Model College Meenangadi | 2019 - 2021, 2022 - 2026

- Taught programming, data structures, and databases, building strong command of core computer science fundamentals
- Reviewed student code and provided structured feedback, developing code-review and mentoring skills
- Collaborated with academic teams on technical content design and delivery

EDUCATION & CERTIFICATIONS

M.Sc. Computer Science *2017*
University of Calicut

B.Sc. Computer Science *2015*
University of Calicut

- Complete Data Engineering Bootcamp: SQL, ETL & Data Pipeline - Udemy (43 hours, 2026)
- Learn Python Programming Masterclass - Udemy (61.5 hours, 2026)
- Python Masterclass 2026: Build 24 Real World Python Projects - Udemy (80.5 hours, 2026)
